EXAMINER

SHIBRU, HELEN

ART UNIT PAPER NUMBER

2616

DATE MAILED: 01/09/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.	Applicant(s)	
09/914,683	WINTER ET AL.	
Examiner	Art Unit	
HELEN SHIBRU	2616	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 31 August 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
- 1) ☒ Certified copies of the priority documents have been received.
  - 2) ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Iitsuka (US Pat. No. 5, 414,686).

Regarding claim 1, Iitsuka discloses Method for recording real-time files containing real-time data, wherein real-time file attributes are permanently assigned to the real-time files and are concomitantly recorded together with the real-time files, the real-time file attributes describing hardware independent real-time requirements of the real-time files during a real-time file transfer for playback of the real-time files, wherein at least the following real-time file attributes are provided (see col. 6 lines 45-63, col. 11 lines 28-54, and col. 13 lines 22-56):

a) a guaranteed minimum transfer rate during the real-time file transfer (see col. 6 line 64- col. 7 line 17), b) a maximum transfer rate during the real-time file transfer (see col. 7 lines 17-38), c) a buffer store size used during the real-time file transfer, and that rules for recording the real-time files are derived from the real-time file attributes in order to ensure that the real-time properties of the real-time files are preserved during the recording process (see col. 6 line 32-col. 7 line 38, col. 8 line 45-col. 9 line 4 and col. 11 lines 42-54).

Regarding claim 2, Iitsuka discloses a fragmented recording of the real-time files the sizes of the file fragments and the distances between the file fragments are chosen in such a way that the real-time file transfer can be performed with the guaranteed minimum transfer rate

during the entire real-time file transfer without any underflow of the buffer store (see col. 12 lines 21-52).

Regarding claim 4, Iitsuka discloses the real-time file attributes are combined in a data block and such a data block is assigned to a real-time file (see col. 4 lines 36-58 and col. 5 lines 36-56).

3. Claims 1-2 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Chung (EP 0953 977A1).

Regarding claim 1, Chung discloses method for recording real-time files containing real-time data, wherein real-time file attributes are permanently assigned to the real-time files and are concomitantly recorded together with the real-time files, the real-time file attributes describing hardware independent real-time requirements of the real-time files during a real-time file transfer for playback of the real-time files, wherein at least the following real-time file attributes are provided (see paragraph 0087-0091 and fig. 3A-3D):

a) a guaranteed minimum transfer rate during the real-time file transfer (see paragraph 0097, 0094, and 0107-0110), b) a maximum transfer rate during the real-time file transfer (see paragraph 0094 and 0097), c) a buffer store size used during the real-time file transfer, and that rules for recording the real-time files are derived from the real-time file attributes in order to ensure that the real-time properties of the real-time files are preserved during the recording process (see paragraph 0094-0097).

Regarding claim 2, Chung discloses a fragmented recording of the real-time files the sizes of the file fragments and the distances between the file fragments are chosen in such a way that the real-time file transfer can be performed with the guaranteed minimum transfer rate

during the entire real-time file transfer without any underflow of the buffer store (see paragraph 0098-0109, 0113-0118).

Regarding claim 4, Chung discloses the real-time file attributes are combined in a data block and such a data block is assigned to a real-time file (see paragraph 0090 and 0098-0105).

Regarding claim 5, Chung discloses the data block is stored in UDF as Extended Attribute in a File Entry or in a System Stream assigned to the real-time file (see paragraph 0087 and 0091).

Regarding claim 6, Chung discloses the real-time file is assigned a fixed area in the useful data area for the real time file attributes (see paragraph 0091-0093).

Regarding claim 7, Chung discloses the real time file attributes are contained in an MPEG private stream (see paragraph 0107-0110).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chung in view of Nordling (US Pat No. (5,943,391).

Regarding claim 3, claim 3 differs from Chung in that the claim further requires a version number is provided as a further real-time file attribute. Although Chung does not specifically teach the version number provided as a further file attribute, Chung discloses real time file attribute information is stored in an information file having an RTRW format named

RTRW\_TS.IFO (see paragraph 0089-0090). Chung further teaches real time file indication information (see paragraph 0092-0093).

In the same field of endeavor Nordling discloses a computer system comprising a plurality of user computers. Nordling further discloses a storage device that stores a real-time data file (see col. 4 lines 10-20). Nordling further discloses the real-time data file includes version number (see fig. 6 and col. 1-22). Therefore in light of the teaching in Nordling it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Chung by providing a version number in order to determine the performance of the system.

### ***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HELEN SHIBRU whose telephone number is (571) 272-7329. The examiner can normally be reached on M-F, 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAMES J. GROODY can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
